R&D Masters Trainee for VR Technologies

Dear Hiring Manager,

I am writing to apply for the R&D Master Internship for Immersive Technologies at Nestlé's System Technology Centre. Currently pursuing a master's degree in computer science, my academic focus and professional interests revolve around the innovative applications of virtual reality technology.

My master's thesis explores the practical applications of VR in enhancing user experiences, with a particular emphasis on medical simulations. This research reflects my deep passion for utilizing VR to revolutionize training methodologies and interactive learning environments.

My recent certification in Unity Programming and Game Design highlights my commitment to mastering Unity technologies and delivering engaging user experiences.

I am eager to contribute my skills in optimizing user experiences, conducting consumer tests, and advancing Nestlé's VR solutions for delivery systems and I am enthusiastic about learning and applying new skills in a professional environment.

Aligned with Nestlé's values of Excellence, Determination, One-team spirit, and Trust, I am eager to collaborate with your team and contribute to Nestlé's mission. I am committed to continuous learning, problem-solving, and delivering impactful results.

I would appreciate the opportunity to discuss how my skills and enthusiasm for VR technology align with the goals of NSTC. Thank you for considering my application. I look forward to the possibility of contributing to Nestlé's success.

Yours sincerely,

Ewelina Jurkiewicz
